

BCIS Webinar Series

International Location Factors: construction cost estimation – Asia/Pacific & Middle East

About the webinar:

BCIS is one of the largest construction data providers in the built environment.

Within this data are location factors that have supported UK industry professionals to develop early-stage cost benchmarking for years. As organisations increasingly work at a global level, how do they operate if targeting different regions? What do they use? How do they make informed investment decisions?

BCIS is broadcasting a FREE WEBINAR for those in the Asia Pacific and Middle East region, with local industry experts, to discuss how they are currently working, where they get their insights from, and what tools they have. We will consider the use of international location factors and ICMS (International Cost Management Standards) – in particular, how they can help in decision-making, when providing early-stage cost advice, and benchmarking when developing preliminary and elemental cost plans.

Join us on: Tuesday 31st October – time will be determined by your location

Length: around 1 hour

Meet the panel:

Ken Creighton
BCIS

Karl Horton
BCIS

Varughese Mathew
IIQS

Mark North
WT Partnership

Dr See Lian Ong
Turner & Townsend

Ken Creighton, Head of International, BCIS and Vice Chair ICMS Coalition

Karl Horton, Chief Data Officer, BCIS

Varughese Mathew, President, Indian Institute of Quantity Surveyors (IIQS), ICMS Trustee. (Dubai, UAE)

Mark North, Associate MEP, WT Partnership Australia & New Zealand, ICMS Trustee New Zealand Institute of Quantity Surveyors (NZIQS) (New Zealand)

Dr See Lian Ong, Turner & Townsend, Former RICS Global President, Former Chair of the ICMS Standard Setting Committee (Malaysia)

Agenda:

- Presentation on Location Factors
- Professional insight (panellists from the region of focus)
- Discussion among panellists on personal experience and methods

How to register:

We'll send you a link to watch the pre-recorded webinar on Tuesday 31st October 2023. When registering we've asked for your closest city, so we can send the link at a suitable time for you.
